- PHP / Laravel
  Full-stack development
- JavaScript / Vue.js
  Frontend development
- HTML / CSS / SQL
  MySQL / phpMyAdmin
- Python / Playwright
  Jira automation (guided)
- Git / GitHub / Docker
  Version control & containers
- Node.js / npm / Vite / Composer
- Postman / Swagger / VS Code
- Jira / Confluence / Slack

FULL-STACK TRAINING

Boolean | 2023
Individual and team web projects

SOFT SKILLS

- Problem solving
- Root cause analysis
- Teamwork
- Technical communication

LANGUAGES

- Italian — Native
- English — B2
- French — Basic

ANDREA CASSINI

Born in Monaco on 7 October 2000

JUNIOR SOFTWARE DEVELOPER

Computer Engineering graduate with full-stack training in PHP, Laravel, JavaScript, Vue.js and SQL, and nearly three years in automotive software validation. Experience in defect investigation, test execution and collaboration with engineering teams. Seeking a junior software development role, with an interest in backend and AI applications.

EXPERIENCE

ITALDESIGN / AUDI

Employed by Reply since December 2023 | Turin, Italy

Current — Software & Systems Validation

Software-oriented system validation, test execution, defect investigation and technical reporting across complex e-Traction, powertrain and battery projects. Analysed traces and supported release readiness with engineering teams.

Previous — Connectivity & Automation

Performed end-to-end software and connectivity testing, defect triage and test case management. Coordinated technical issues across teams during temporary Function Owner responsibilities.
Contributed to Python / Playwright automation for repetitive Jira test-management workflows with guidance.

OTHER SOFTWARE TESTING PROJECTS

ART — Lamborghini & Aston Martin: End-to-end infotainment and connectivity validation, HMI testing and defect analysis.
Stellantis: Software test execution, test case management, bug reporting and troubleshooting of connected systems.

Technical Diagnostics

Autofficina Cassini | 2022
Electronic diagnostics and troubleshooting.

Full Stack Web Developer

Freelance | June 2020 – April 2021
Frontend, backend and database development with PHP, Laravel, JavaScript, HTML, CSS and SQL.

EDUCATION & TRAINING

Universitas Mercatorum

Bachelor's Degree in Computer Engineering | October 2026
Thesis: Manual and automated software testing and their differences.

Boolean — Full Stack Web Programming

2023 | PHP, Laravel, JavaScript, Vue.js, HTML, CSS, SQL; individual and team projects.

Liceo G. P. Vieusseux

2020 | Scientific High School Diploma

PERSONAL PROJECT

AI application prototype built with AI assistance; explored OpenAI and Anthropic APIs, using GitHub, Docker and VS Code.
